

Existing Whatwire Email Accounts

To add outgoing email server authentication to your existing email account, please select one of the following:

- A. If you are using [Microsoft Outlook Express](#) please use the following steps:
1. Launch Outlook Express.
 2. Click "Tools" at the top of the page, then click "Accounts", click the "Mail" tab, select the appropriate email account (under the Account column), then click the "Properties" button, right side of page,
 3. Select the "Servers" tab, at the bottom of the Servers page, select (enable) "My server requires authentication" box,
 4. Then click the "Apply" box, click the "OK" button and the "Close" button.
- B. If you are using [Microsoft Outlook](#) please use the following steps:
1. Launch Outlook.
 2. Click "Tools" at the top of the page, then click "Email Accounts", click "View or change existing e-mail accounts" and then click "Next".
 3. Select the name of the email account that you want to update, then click the "Change" button on the right,
 4. In the lower right corner, click the button "More Settings", then select the "Outgoing Server" tab,
 5. Select the "My outgoing server (SMTP) requires authentication" box and the "Use same settings as my incoming mail server" box--both should be checked (enabled), then click the "OK" button then click "Next",
 6. Click the "Finish" button.
